DO AND DON'T DO

DO

1. ALL Field are clear with unconfuse information
2. "Further Description" are allow to Insert Clear Image for the convenience of refer .
- recommended for the stock name are unfamiliar
-Insert important product specifications
3. Follow the official SOP and stock code format strictly
4. Check existing stock codes before creating a new one to avoid duplication
5. Use clear and standardized product descriptions
6. Include important details such as brand, size, color, model, or specification
7. Ensure the unit of measurement is correct (PCS, BOX, PKT, ROLL, etc.)
8. Confirm the category and product grouping correctly
9. Ask for verification if unsure before creating the stock code
10. Keep the stock code simple, searchable, and easy to understand
11. Ensure supplier information and costing are accurate

DON'T DO

1. Do not create duplicate stock codes for the same item
2. Do not use short forms or descriptions that only you understand
3. Do not create stock codes without checking existing records
4. Do not randomly change naming formats between branches
5. Do not use special symbols or unnecessary wording
6. Do not create one item under multiple categories
7. Do not skip important product specifications
8. Do not simply copy old stock codes without proper checking
9. Do not create temporary or "testing" stock codes in the live system
10. Do not proceed if unclear — always ask first

Reminder

A properly created stock code helps:

- Improve inventory accuracy
- Reduce purchasing mistakes
- Speed up sales and quotation processes
- Improve reporting and stock tracking
- Maintain standardization across all branches
